

INVESTMENT SUMMARY

Longevity Resort

FIVE NUMBERS DEFINE THIS OPPORTUNITY

10% fixed annual return
for the first three years, paid quarterly

Contractual buyback option
exercisable at the end of month 36

30-year registered leasehold
together with the relevant land-use rights

From EUR 195,000 (VILLA M)
to EUR 295,000 (XL Villa)

69 villas
on Koh Samui's north-east coast

Longevity Resort brings together private ownership and a managed investment structure in a single asset. It is located in one of Thailand's established villa-rental markets, where the independent-villa segment recorded 71.5% occupancy in Q1 2025. For the first three years, the fixed-return programme operates under the terms of the Rental Management Agreement.

WHY KOH SAMUI. WHY NOW?

Koh Samui has become one of Asia's most desirable island destinations, combining beaches, jungle trails, restaurants, traditional Thai temples and a well-established wellness culture. Everything is within easy reach.

The independent-villa segment reached reached 71.5% rental occupancy in Q1 2025.

Plai Laem area accounts for ~70% of the island's primary-market residential supply

RETURN, EXIT, AND THE FIVE-YEAR VIEW

THE RETURN

A 10% annual return for the first three years, paid quarterly under the Rental Management Agreement. The return is not linked to occupancy. The developer's payment obligations are governed by the contractual documentation.

For a Villa M priced at approximately EUR 195,000, this equates to EUR 19,500 per year, EUR 4,875 per quarter and EUR 58,500 over the full 36-month period.

Buyers may instead choose to participate in the market-based rental programme, under which returns depend on occupancy, nightly rates, operating costs and other market conditions.

THE EXIT

At the end of month 36, the buyer may exercise the contractual buyback option, subject to the terms of the purchase agreement.

If the buyback option is not exercised, the fixed-return period ends after month 36. From month 37, rental income is calculated on a market basis, subject to occupancy, operating performance and the terms of the management agreement.

THE FIVE-YEAR VIEW

For years four and five, the illustration assumes annual returns of 4% in the conservative scenario, 6% in the base scenario and 8% in the optimistic scenario.

Based on a purchase price of EUR 195,000, the illustrative cumulative five-year gross return would be approximately EUR 74,100, EUR 81,900 or EUR 89,700 respectively, before taxes, fees, operating costs and any reduction associated with personal use.

STRUCTURED FOR TRUST. PAYMENTS LINKED TO MILESTONES.

Ownership is structured through a 30-year registered leasehold, together with the relevant land-use rights, subject to the final legal documentation. Payments are linked to defined construction milestones. Buyers should obtain independent Thai legal advice before entering into any agreement. The ownership structure is intended to avoid nominee-shareholding arrangements and should be reviewed independently.

THE PAYMENT SCHEDULE

Each instalment is linked to a defined construction milestone, allowing payments to follow documented project progress.

5%

Reservation deposit payable on signing the reservation agreement

45%

Upon registration of the 30-year lease at the relevant Land Department office

40%

Upon completion of the superstructure

10%

Upon handover

WHAT WE PUT IN WRITING

- A contractually fixed 10% ROI for three years.
- A buyback option at month 36.
- A transparent legal and contractual framework
- Independent legal review before purchase

WHAT WE CANNOT PROMISE

- Market appreciation.
- A 10% return after month 36.
- A stable THB to EUR exchange rate

THREE WAYS FORWARD

1

A 30-minute video consultation with Dorina, including a personal walk-through of the key figures.

2

Select your preferred residence using the 3D viewer, followed by a tailored proposal.

3

A private on-site visit to Plai Laem, combined with a personalised island discovery tour.
